Yontro Team SOPs

Oct 26, 2026 · @celo

How to use these SOPs

Every client passes through all three of you in a fixed order: Usama wins them with a free video, Lianna plans and runs the account, and Azeem shoots and edits. Each SOP below covers one role's steps, deadlines and handoffs, so nothing waits on a question.

The client journey in one line: cold call → free video → signed package → onboarding (7 days) → monthly cycle (paid in advance, then plan, shoot, post, report) → renewal after month 3.

The packages everyone must know:

Package	Monthly fee (AED)	Deliverables per month
Launch	5,000	5 videos + 5 posts, website basic or redesign, monthly report
Growth	7,500	10 videos + 10 posts, website + full branding, presence audit
Scale	10,000	15 videos + 15 posts, tailored paid campaign (ad spend paid by client)

Contract terms everyone must know: 3-month minimum commitment as standard; a 1- or 2-month term only when ticked and initialled on the agreement. Then month to month with 30 days' notice. Payment is in advance: the first month on signing, then each month before it starts. Client sends materials within 7 days of signing and approves content within 48 hours. A missed video is delivered the next month or credited to the next invoice.

Shared rules:

- One shared client tracker (Google Sheet or CRM): one row per client, with stage, package, next action and next action date.
- One WhatsApp group per client: the client's point of contact, Lianna, Azeem and Usama.
- Every video has a job (reach, trust or convert) and every convert video has its own WhatsApp code word, so enquiries can be counted.
- Nothing is posted without client approval.

SOP 1: Usama Rehman, Sales Manager

Usama's job is signed packages, and the free video is the tool to win them. Success is measured by signed clients per month, not by calls made.

Owns: prospect lists, cold calls, booking and closing the free video, the signed agreement, handover to Lianna. Also manages and trains the sales agents as they are hired.

Daily routine

Time	Task
10:00–10:30	Build or refresh today's list: 50 businesses from Google Maps and Instagram in one area and one niche
10:30–13:00	Call block 1. Log every call in the tracker
13:00–14:00	WhatsApp follow-ups to yesterday's callbacks and free-video leads
14:00–17:00	Field visits: audits, free-video shoots with Azeem, closing meetings
17:00–18:30	Call block 2 (owners are often easier to reach late afternoon)
18:30–19:00	Update the tracker; set every lead's next action date

Step by step: from cold call to signed client

1. **Qualify the prospect before calling.** A good prospect has a storefront or service in Dubai, an Instagram page that is quiet, inconsistent or has no faces, and an owner who can decide. Skip chains whose marketing is run from head office.
2. **Cold call (target: book the free video).** Opener: "Hi, is this the owner? I'm Usama from Yontro, a video agency in Business Bay. I looked at your Instagram. We'd like to shoot one reel for your business, free, no contract. If you like it, we talk. Which day this week suits you?" Log the outcome: no answer, call back, not interested, free video booked.
3. **Run a 10-minute presence audit before the shoot.** Note three gaps on their page (for example no video, posting stopped, no call to action). These become the pitch.
4. **Brief Azeem within 24 hours of booking.** Send in the client's WhatsApp group: business name, address, shoot date and time, what they sell, who will be on camera, the three gaps.

5. **Attend the free-video shoot.** Use the visit to meet the decision maker and agree a date for the follow-up meeting.
6. **Deliver the free video and pitch within 5 working days.** Show the video, the three gaps and how the 3-month plan fixes them. Recommend one package; do not present all three equally.
7. **Close.** Fill in the Yontro Service Agreement (two copies) and Schedule A, and collect the first month's payment against an invoice. Tick the package and term (3 months as standard), and collect copies of the client's trade licence and the signatory's ID. Remind them of the 7-day materials rule and the 48-hour approval rule.
8. **Hand over to Lianna the same day** using the checklist below. A client is not "closed" until the handover is done.
9. **Follow up the ones who said no:** WhatsApp after 7 days, then monthly. Log the reason they gave.

Handover checklist (Usama → Lianna, same day as signing)

- [ ] Signed agreement and trade licence copy saved in the client folder
- [ ] Package and start date entered in the tracker
- [ ] Client's point of contact: name, role, WhatsApp number
- [ ] Client WhatsApp group created with Lianna and Azeem added
- [ ] Audit notes (the three gaps) and the free video's link and results
- [ ] Anything promised verbally during the sale, written down

Objections

They say	You say
"We already post ourselves"	Show the audit gaps. "You post. We make posting bring enquiries, and we count them."
"Too expensive"	"You get every video in your package on agreed dates. If we miss one, we make it up or credit it."
"We tried an agency before"	"That's why we start with a free video. Judge the work before you sign."
"I don't want to be on camera"	"Anyone from your team works: a manager, a therapist, a technician. We coach them."
"Why 3 months?"	"Month 1 fixes the basics, month 2 finds the story that sells, month 3 scales it."

Daily KPIs (every rep, every working day)

KPI	Target
Calls and outreaches	100 a day
Meetings booked for the next day	4 a day
Meetings done today	2 a day
Follow-ups due in the pipeline	All cleared by 13:00
Closed deals	2 a week

Each rep fills in their row on the Sales Daily KPIs tab of the Yontro Sales KPIs & Pipeline sheet by 19:00. Weekly totals calculate by themselves. Accounting and growth targets are in a separate file only Sahill can see.

The pipeline

Every deal lives on the Pipeline tab of the same **Yontro Sales KPIs & Pipeline** sheet with a traffic light: **Green** (expected to sign within 7 days), **Yellow** (interested, but a named blocker is stopping them) or **Red** (unlikely right now). Every open deal has a blocker (or "None"), a next action and a next follow-up date. The sheet flags follow-ups as TODAY or OVERDUE by itself.

Rules: never promise views, followers or sales (the contract says these are targets, not guarantees), and never discount without the founder's approval.

SOP 2: Lianna Gozmao, Content Strategist & Account Manager

Lianna owns each client from signing to renewal: the strategy, the calendar, every approval, the posting and the monthly report that proves what the work brought in. Success is clients who renew after month 3.

Owns: onboarding, the Get Viral Blueprint session, the 3-month strategy, monthly content plans and shot lists, approvals, posting, comments and DMs, reporting, invoicing triggers, renewals. Also posts and records all data for Yontro's own three pages and controls both Google Sheets (SOP 4).

Onboarding: days 1–7 after signing

1. **Day 1: welcome message** in the client WhatsApp group. List what's needed: logo, photos, price list or menu, Instagram/TikTok/Facebook access, Google Business Profile access, one approver.

2. **Day 1: post the free video** (if not already live) and record its 48-hour numbers as the baseline: views, saves, shares, DMs.
3. **Day 1–2: run the Get Viral Blueprint session** at the client's premises (60 minutes). Capture:
   - Top 3 products or services by revenue, and the one with the best margin
   - Who buys: age, nationality, area, language
   - Why customers choose them over the competitor next door
   - The 10 questions customers always ask (each one is a video)
   - Who will be on camera
   - One offer to push this month
4. **Day 2–3: fix the profile.** Bio (what, where, one call to action), WhatsApp click-to-chat link, highlights (prices, reviews, location), Google Business Profile updated.
5. **Day 3–4: write the 3-month strategy and month 1 plan** (template below). Send to the client for approval.
6. **Day 4: brief Azeem** with the approved shot list and book shoot day with the client.
7. **Day 5–7: shoot day, then the seven-day rule:** post every day for the first 7 days. On Launch (5 videos), fill the week with the free video, designed posts, carousels and Stories cut from the shoot.

Monthly plan template (one per client per month)

For every video, fill one row:

#	Bucket	Idea and hook (first 2 seconds)	On camera	Call to action + code word	Post date
1	Reach				
2	Trust				
3	Convert			WhatsApp "CODE"	

Mix: about 40% reach (trends, guess the price, myths, process shots), 40% trust (owner or staff on camera, behind the scenes, FAQs), 20% convert (offer, how to book, testimonials).

Monthly cycle

When	Task
Week 4 of the previous month	Review last month's numbers. Write next month's plan and shot list. Client approves within 48 hours

When	Task
5 days before shoot day	Brief Azeem: approved shot list, props, who is on camera, location access
Shoot day	Attend if possible: direct the talent, capture extra Stories
Edits received	Send to the client for approval within 24 hours. Two rounds of changes per video, then it's locked
Posting days	Post at the planned time with caption, hashtags, location tag and Collab invite to the Yontro account. Test new hooks with Instagram trial reels first
Daily	Reply to comments within the working day. Forward enquiries (DMs, code words) to the client within 15 minutes
Last working day of the month	Send the monthly report and list any videos to make up next month. Next month's invoice went out 7 days before and is paid before the month starts

The monthly report (one page)

- Videos and posts delivered vs package
- Views, reach, followers gained, saves and shares
- **Enquiries by code word** and the client's confirmed bookings or sales
- Best and worst video, and why
- What we do more of next month

Escalation rules

- Client misses the 48-hour approval: remind once at 24 hours, then post the approved backup content and note it in the report.
- Materials not sent by day 7: tell the founder; the delay is recorded in writing.
- Shoot cancelled with less than 24 hours' notice: log it; under the contract it may count as delivered.
- A client unhappy twice in one month: founder joins the next call.

Renewal (month 3)

In week 2 of month 3, present the 3-month results and a plan for months 4–6. Recommend the next package up if the numbers support it.

SOP 3: Azeem Shafi, Creative Director

Azeem turns each approved plan into finished videos: one shoot day per client per month, edits delivered within 4 working days, every video built to be watched to the end. Success is videos delivered on time that clients approve in one round.

Owns: free-video shoots, monthly shoot days, editing, hooks and on-screen text, the Yontro visual look per client, equipment, raw footage storage. Also produces Founder Tales and the A and B versions for all three of Yontro's own pages (SOP 4). Also trains and reviews the videographer-editors as they are hired.

Free-video shoot (for Usama's prospects)

1. Read Usama's brief the day before: what they sell, who's on camera, the three gaps.
2. Shoot one reel in under an hour on site. Pick the format most likely to stop a scroll for that business: a process shot, a price reveal or the owner answering a common question.
3. Deliver the edited reel to Usama within 3 working days, so he can pitch inside the 5-day promise.

Before shoot day (from 5 days out)

- [ ] Receive the approved shot list from Lianna; flag anything that cannot be shot in one day
- [ ] Write a shot plan per video: opening shot, hook line, B-roll, ending with the call to action
- [ ] Confirm with the client: time, who is on camera, location access, outfits, products ready
- [ ] Check kit the night before: batteries charged, cards empty, mics, lights, gimbal, tripod

Shoot day checklist

1. Arrive 30 minutes early. Walk the space and pick 2–3 setups with good light.
2. Coach the talent for 5 minutes before recording: short lines, look at the lens, energy up.
3. Shoot the hook of every video first, 3 takes each, so the most important 2 seconds have options.
4. Shoot vertical 9:16, 4K where possible. Record clean audio on a mic for any talking video.

5. Capture extra B-roll and 5–10 Story clips for Lianna's first-week posting.
6. Before leaving, tick off every video on the shot list. Missing shots are fixed on the day, not later.
7. Back up footage to the shared drive the same day, in the client's folder by date.

Editing standard (every video)

- Hook in the first 2 seconds, on screen in text and spoken
- Reach videos 7–20 seconds; trust videos 30–45 seconds
- Burned-in subtitles in the client's style; Arabic, Hindi or Russian when the plan says so
- Cut every pause; something changes on screen every 2–3 seconds
- Trending or licensed audio only, chosen for the platform it will post on
- One call to action at the end, with the video's code word exactly as Lianna wrote it
- Client's colours, font and logo applied the same way every time
- Export 1080x1920, named `client_videoNumber_date`, cover frame chosen

Delivery and revisions

- Edits to Lianna within 4 working days of shoot day; she sends them to the client.
- Two rounds of changes per video are included. A third round, or a reshoot, is flagged to Lianna and the founder before doing it.
- Raw footage stays with Yontro (per the contract). Finished videos belong to the client once paid.

Weekly numbers to report (Sunday)

Metric	Target
Videos delivered vs due this week	100%
Videos approved in the first round	80%
Average days from shoot to delivery	4 or fewer

When client volume passes what one person can shoot, the shoot calendar is shared with the new videographer-editors, and Azeem reviews every video before it goes to Lianna.

SOP 4: Yontro's own pages (Azeem and Lianna)

Yontro's three pages post at least 3 videos a day each. Every day, 2 of tomorrow's videos are A/B tested, and the winning version goes live the next day. Each winning change becomes a **constant**: it is logged and used in every video after that.

Page	Purpose	Content made by	Posted and recorded by
Sahill (founder)	Personal brand: trust, opinions, behind the scenes, leads	Lianna plans, Azeem shoots and edits	Lianna
yontro.ae	Proof: client results, before/after, free-video offer, team	Lianna plans, Azeem shoots and edits	Lianna
Founder Tales	Reach: founder stories that get shared	Azeem researches and produces with Claude	Lianna

Variable testing (the A/B rule)

1. **Pick 2 of tomorrow's videos per page to test.** For each, choose ONE variable from the list on the sheet's Variables tab: hook line, first frame, length, on-screen text style, caption, audio, cover, call to action, posting time.
2. **Make version A and version B.** A follows every current constant. B is identical except for the one variable. Two changes in one test means the test is void.
3. **Run the test as Instagram trial reels** (shown to non-followers only), posted by Lianna by 18:00 the day before.
4. **Read the result after 24 hours.** Main measure: average watch time %. B wins only if it beats A by 10% or more on the main measure with at least 500 views each. Otherwise A wins.
5. **Post the winner to the main feed that day,** in its planned slot.
6. **Record the new constant.** When B wins, Lianna adds it to the Constants tab with the test ID and date. Azeem applies it to every video from the next day on. A constant can be challenged by a new test at any time.

Daily cycle

Time	Azeem	Lianna
10:00		Record yesterday's live-post numbers and test results; declare winners; update Constants
10:30	10-minute check-in: today's winners, new constants, tomorrow's plan	Same
10:45–15:30	Research and produce tomorrow's videos, A and B versions for the test videos	Plan tomorrow's Sahill and yontro.ae videos; post today's videos at 12:00, 17:00 and 21:00
16:00	Deliver tomorrow's files to the shared drive, named `PAGE_YYYYMMDD_slot_A/B`	Check files against the plan and constants
18:00		Upload tomorrow's 4 test versions as trial reels per page; log them on the AB Tests tab

Founder Tales production (Azeem)

1. **Research:** pick a founder story with a clear turning point. Check every fact against 2 sources and save the links in the sheet.
2. **Script with Claude:** hook in the first line, one story, one lesson, ending with a follow call to action. Keep it under 60 seconds.
3. **Produce:** visuals, voice and subtitles, applying every current constant.
4. **Make the B version** for the day's test videos, changing only the chosen variable.
5. **Deliver by 16:00** with the sources and the variable noted on the Uploads tab.

KPIs (weekly, reviewed Sunday)

Person	KPI	Target
Azeem	Videos delivered per page per day	3 + 2 B versions
Azeem	Files delivered by 16:00	100% of days
Azeem	Videos that follow all current constants	100%
Azeem	Fact errors found after posting (Founder Tales)	0

Person	KPI	Target
Lianna	Videos posted per page per day	3
Lianna	Data recorded by 11:00	100% of days
Lianna	Tests read and decided within 24 hours	100%
Lianna	Weekly page report sent Saturday	Every week
Both	Followers, average views, average watch %, shares, DMs per page	Baseline in weeks 1–2, then a growth target per page

The two Google Sheets (owned by Lianna)

Lianna is the only person who records and edits data. Azeem gets comment access plus edit access to his Uploads columns; Sahill gets view access.

- **Yontro Content & Uploads** (our 3 pages): Calendar, Uploads, AB Tests, Constants, Variables (with Settings), Page KPIs, Team KPIs. The winner and the weekly KPIs calculate themselves.
- **Yontro Clients:** Clients, Packages, Content Plan, Uploads, Enquiries (code words), Monthly Report (delivered vs due, videos to make up).

Keep the two files separate so client data is never mixed with our own pages.

Handoffs, deadlines and weekly rhythm

Every handoff has one owner and one deadline; a step is done only when the next person has what they need.

Usama wins the client, then Lianna and Azeem repeat a monthly loop

client handoffs · 3 roles, 8 steps, monthly loop

Steps 5 to 8 repeat every month. In month 3, Lianna adds the renewal review.

Handoff	From → To	Deadline	What is passed
Free-video brief	Usama → Azeem	Within 24 hours of booking	Business, address, time, on-camera person, 3 gaps
Free video	Azeem → Usama	3 working days after the shoot	Edited reel
Signed client	Usama → Lianna	Same day as signing	Handover checklist (SOP 1)

Handoff	From → To	Deadline	What is passed
Shot list	Lianna → Azeem	5 days before shoot day	Approved plan, talent, props, access
Edits	Azeem → Lianna	4 working days after shoot day	Exported videos, named and with covers
Next month's invoice	Lianna → Founder	7 days before the month starts	Client, package and amount; paid before the month starts

Weekly team rhythm

Day	Meeting	Who	Agenda
Monday 10:00 (15 min)	Week kickoff	All three + founder	Shoots this week, free videos booked, client issues
Daily	Tracker update	Each person	Every lead and client has a next action date
Saturday (30 min)	Weekly numbers	All three + founder	Sales numbers (Usama), delivery numbers (Azeem), client results and risks (Lianna)
Last working day of the month	Month close	Lianna + founder	Reports sent, next month's payments confirmed, shoot calendar locked
