Contraindications & Host Screening Checklist

Document No. AUR-FRM-03 · Version 0.1 (Draft) · Owner: Clinical Lead · Effective: [Date]

> Guidance pending review. This checklist is a working draft. It must be reviewed and approved by the Clinical Lead and checked against current Elevé Health protocols and manufacturer instructions for every unit before use. Where Elevé guidance or a guest's doctor is stricter, the stricter rule applies.

How to use this checklist

1. Before every session, review the guest's Health Questionnaire (AUR-FRM-02) and today's daily check-in.
2. Find the modality section below. If any **absolute contraindication** applies, do not proceed. Offer an alternative modality and record it.
3. If any **medical clearance** item applies, the session goes ahead only with written clearance from the guest's doctor on file.
4. Tick every **pre-session check** before the guest begins. If you cannot tick a box, pause and ask the Shift Lead or Clinical Lead.
5. Every visit begins with the breathing ritual: in for four, out for six. Use it to read the state the guest arrived in.
6. When in doubt, do not proceed. A Host is always entitled to decline or shorten a session.

> Clinical modalities. IV Nutrient Therapy and Hyperbaric Oxygen are subject to Dubai Health Authority (DHA) requirements. Each session needs sign-off by the Clinical Lead or a DHA-licensed clinician before it starts. Facility reference: [DHA licence / approval reference].

Guest name	Guest ID	Date	Host
_____	_____	___ / ___ / _____	_____

Universal checks (every modality)

☐	Check
☐	Health Questionnaire on file and less than [12] months old
☐	Daily check-in completed and signed today
☐	Relevant consent signed (AUR-FRM-04 and, where applicable, AUR-FRM-05)
☐	No alcohol or recreational drugs in the last 24 hours
☐	Guest feels well; no fever or acute illness
☐	Guest hydrated; water offered
☐	Guest knows how to stop the session and call the Host

☐	Check
☐	Equipment shows no fault; within Elevé service date

1. Whole-Body Cryotherapy (Reset · 3 min · Elevé E-CRYO PRO, to −110 °C)

Category	Item
Absolute contraindication	Pregnancy
Absolute contraindication	Uncontrolled high blood pressure (reading above [___/___] mmHg today)
Absolute contraindication	Recent heart attack, unstable angina, arrhythmia, heart failure or pacemaker
Absolute contraindication	Raynaud's phenomenon, cold urticaria or cold allergy
Absolute contraindication	Deep vein thrombosis, peripheral vascular disease or acute stroke history
Absolute contraindication	Acute fever, infection or open wounds; severe claustrophobia
Medical clearance	Controlled hypertension, cardiovascular history, diabetes with neuropathy
Medical clearance	Epilepsy, kidney disease, cancer, anaemia, hypothyroidism
Medical clearance	Guests under 18 (see AUR-FRM-06)

☐	Pre-session check
☐	Blood pressure taken and recorded: _____ / _____ mmHg
☐	Skin completely dry; no sweat, lotion or oils
☐	Jewellery, piercings, glasses and contact lenses removed where possible
☐	Dry gloves, socks, slippers, ear band and face mask (if used) on
☐	Underwear dry and cotton; no wet swimwear
☐	Guest briefed: keep moving, breathe steadily, step out at any time
☐	Thermal-vision monitoring active; Host stays in visual and verbal contact for the full 3 minutes
☐	Session time set (first visit: [___] min maximum)

2. Red-Light Bed (Heal · 20 min · 660 / 850 nm)

Category	Item
Absolute contraindication	Photosensitising medication (for example, isotretinoin in last 6 months, some antibiotics)
Absolute contraindication	Light-triggered epilepsy or photosensitivity disorders (for example, lupus, porphyria)
Absolute contraindication	Active cancer or lesions in the treatment area

Category	Item
Medical clearance	Pregnancy
Medical clearance	Eye conditions (glaucoma, retinal disease)
Medical clearance	Thyroid conditions; recent cosmetic laser or peel

☐	Pre-session check
☐	Skin clean; no heavy make-up, lotion or self-tan
☐	Protective eyewear issued and worn
☐	No photosensitising medication confirmed
☐	Bed sanitised; timer set to 20 min
☐	Guest shown the stop control

3. Infrared Sauna (Heal · 40 min · 45–60 °C)

Category	Item
Absolute contraindication	Pregnancy
Absolute contraindication	Unstable cardiovascular disease, recent heart attack, severe aortic stenosis
Absolute contraindication	Alcohol in the last 24 hours; fever or acute infection
Absolute contraindication	Haemophilia or active bleeding
Medical clearance	High or low blood pressure; heart conditions; pacemaker
Medical clearance	Diabetes, kidney disease, multiple sclerosis, heat sensitivity
Medical clearance	Metal implants; silicone implants; recent surgery

☐	Pre-session check
☐	Guest drank water before entry; water bottle in cabin
☐	Temperature set: _____ °C (first visit: lower end of range)
☐	Session length set: _____ min (first visit: [___] min maximum)
☐	Guest briefed on signs to leave: dizziness, nausea, headache, palpitations
☐	Host check-in scheduled every [___] min
☐	If pairing with Cold Plunge, order and rest interval agreed

4. Hyperbaric Oxygen (Heal · 60 min · 1.3–2.0 ATA) — clinical

> Clinical Lead / DHA-licensed clinician sign-off required before every session. Subject to DHA requirements.

Category	Item
Absolute contraindication	Untreated pneumothorax (collapsed lung)
Absolute contraindication	Certain chemotherapy agents (to be confirmed by clinician)
Absolute contraindication	Pregnancy
Absolute contraindication	Acute cold, sinus congestion or ear infection; perforated eardrum
Absolute contraindication	Implanted devices not rated for pressure
Medical clearance	COPD, emphysema, asthma or history of chest surgery
Medical clearance	Epilepsy or seizure history; uncontrolled fever
Medical clearance	Heart failure, uncontrolled high blood pressure, diabetes on insulin
Medical clearance	Claustrophobia; recent ear or sinus surgery; eye conditions

☐	Pre-session check
☐	Clinician review completed and signed (below)
☐	Guest taught ear-equalising technique
☐	No flammable items, lighters, electronics, oils or hair products in chamber
☐	Cotton clothing only
☐	Pressure set: _____ ATA (as prescribed by clinician)
☐	Two-way communication tested
☐	Host remains at control panel for the full session

Clinician name	DHA licence no.	Signature	Date / time
_____	[DHA licence no.]	_____	_____

5. IV Nutrient Therapy (Elevate · 45–60 min) — clinical

> Administered only by DHA-licensed clinical staff. Clinical Lead sign-off required. Subject to DHA requirements. Hosts do not prepare, administer or adjust IV therapy.

Category	Item
Absolute contraindication	Known allergy to any ingredient in the formula
Absolute contraindication	Congestive heart failure; severe kidney disease
Absolute contraindication	Clinician judges vital signs unsuitable on the day
Medical clearance	Pregnancy or breastfeeding
Medical clearance	Kidney or liver disease; G6PD deficiency (for certain

Category	Item
	formulas)
Medical clearance	Diabetes; high blood pressure; heart conditions
Medical clearance	Anticoagulants or bleeding disorders; current medications that may interact

☐	Pre-session check (clinician)
☐	Clinical assessment and vital signs recorded
☐	IV Nutrient Therapy consent (AUR-FRM-05, section 3) signed
☐	Formula confirmed: _____
☐	Allergies re-checked
☐	Guest has eaten in the last [___] hours

Clinician name	DHA licence no.	Signature	Date / time
_____	[DHA licence no.]	_____	_____

6. Float & Sensory Reset (Reset · 60 min · 500 kg Epsom salt)

Category	Item
Absolute contraindication	Epilepsy or seizures not controlled
Absolute contraindication	Open wounds, fresh tattoos or contagious skin conditions
Absolute contraindication	Infectious illness, incontinence, or under the influence of alcohol or drugs
Absolute contraindication	Kidney failure (magnesium absorption)
Medical clearance	Pregnancy
Medical clearance	Low blood pressure; severe claustrophobia; serious mental-health condition
Medical clearance	Recent hair colouring (last 48 hours)

☐	Pre-session check
☐	Guest showered before entry
☐	Ear plugs offered; petroleum jelly offered for minor nicks
☐	Light and door controls explained; guest may keep light on
☐	Water temperature and filtration log checked today
☐	Emergency call button shown

7. Compression Recovery (Heal · 30 min · 7-zone boots)

Category	Item
Absolute contraindication	Known or suspected deep vein thrombosis or blood clots
Absolute contraindication	Congestive heart failure; pulmonary oedema
Absolute contraindication	Acute infection, open wounds, fracture or acute injury in the legs
Medical clearance	Pregnancy
Medical clearance	Peripheral vascular disease, diabetes with neuropathy, lymphoedema
Medical clearance	Anticoagulant use; recent surgery

☐	Pre-session check
☐	No leg pain, swelling or redness reported
☐	Correct boot size fitted
☐	Pressure set: _____ (light / medium / firm)
☐	Guest shown how to pause or stop

8. Dry Float Bed (Reset · 30 min · fully clothed)

Category	Item
Absolute contraindication	Acute illness or fever
Medical clearance	Pregnancy (later stages)
Medical clearance	Heat sensitivity; recent back or abdominal surgery

☐	Pre-session check
☐	Sharp objects removed from pockets
☐	Water temperature checked
☐	Guest positioned comfortably; stop control shown

9. Salt Cabin (Reset · 30 min · E-Salt Cabin: salt air, red light, oxygen, aromatherapy)

Category	Item
Absolute contraindication	Active tuberculosis; acute respiratory infection with fever
Absolute contraindication	Severe uncontrolled asthma or COPD
Absolute contraindication	Open wounds or bleeding

Category	Item
Medical clearance	Asthma; COPD; high blood pressure; heart conditions
Medical clearance	Pregnancy; cancer; claustrophobia
Medical clearance	Photosensitivity (red light); essential-oil allergy (aromatherapy)

☐	Pre-session check
☐	Inhaler (if used) carried in by guest
☐	Aromatherapy: ☐ on ☐ off (per guest preference)
☐	Oxygen and red light settings confirmed per Elevé protocol
☐	Cabin sealed and communication tested

10. Cold Plunge (Reset · 2–5 min · 5 °C · always Host-guided)

Category	Item
Absolute contraindication	Pregnancy
Absolute contraindication	Heart conditions, arrhythmia, pacemaker, uncontrolled high blood pressure
Absolute contraindication	Raynaud's phenomenon, cold urticaria
Absolute contraindication	Open wounds; alcohol in last 24 hours; epilepsy not controlled
Medical clearance	Controlled high blood pressure; diabetes; asthma
Medical clearance	Recent surgery; anxiety or panic disorder

☐	Pre-session check
☐	Water temperature: _____ °C; filtration log checked
☐	Guest briefed on cold-shock breathing: long, slow exhales
☐	Host present at the plunge for the full immersion; timer set: _____ min
☐	Entry and exit points clear; towel and robe ready
☐	First visit: [___] min maximum; head stays above water

11. Guided Breathwork (Reset · 45 min · 1:1 or small group)

Category	Item
Absolute contraindication	Recent heart attack or stroke; uncontrolled epilepsy (for intense techniques)
Medical clearance	Pregnancy (no breath-holding or rapid techniques)

Category	Item
Medical clearance	High blood pressure; heart conditions; glaucoma; recent surgery
Medical clearance	Panic disorder, PTSD or serious mental-health condition

☐	Pre-session check
☐	Technique chosen to suit today's state: _____
☐	No breath-holds for guests with cardiovascular or pregnancy flags
☐	Guest told they may return to normal breathing at any time
☐	Never practised in or near water
