Emergency & Incident Response Procedure

Document No. AUR-SAF-04 · Version 0.2 (Draft) · Owner: General Manager · Effective: [Date]

> Draft for internal use. To be reviewed by a UAE-qualified legal adviser once the trade license is issued.
>
> IV Nutrient Therapy is not offered at launch. If clinical services are added in future, subject to DHA licensing, a Clinical Lead would be appointed and clinical emergency steps (adverse reactions, needlestick injury) added to this procedure.

1. Purpose

This procedure tells every Host, Healer and Duty Manager exactly what to do when something goes wrong at the Jumeirah 1 studio. With 2 Hosts per shift (9:00am–9:00pm, 7 days), one Host responds while the other calls for help and looks after other guests. No medical treatments are offered at launch and there is no clinician on the floor. Read it at induction. Practise it in drills. In an emergency, stay calm and slow your own breath first: in for four, out for six. A steady Host helps a frightened guest.

2. Emergency numbers (UAE)

Service	Number
Ambulance	998
Police	999
Civil Defence (fire)	997
General Manager	[Phone]
Out-of-hours contacts after the General Manager	[CEO contact order to be confirmed]
[Medical Director named on the licence] (oversight and escalation, not on site)	[Phone]
Elevé Health technical support	[Phone]
Building management / landlord	[Phone]

Studio address to give emergency services: 332 Jumeirah First, Jumeirah Beach Road, Jumeirah 1, Dubai. Nearest landmark: [Landmark]. Ask a colleague to meet the ambulance at the entrance.

3. General rules for every emergency

1. Make yourself and others safe first.
2. Stop the session safely using the device's stop or emergency stop.
3. Call for help: shout for a colleague or use [radio / call button]. Name your location.
4. Call 998 if the guest is unresponsive, not breathing normally, has chest pain, seizure, severe allergic reaction, or serious injury. If in doubt, call.

5. Give first aid within your training. Bring the AED from [AED location].
6. Stay with the guest. Never leave a guest alone in a device or after an incident.
7. Inform the Duty Manager, who informs the General Manager.
8. Complete the Incident Report Form (Section 7) before the end of the shift.

4. Step-by-step responses

4.1 GUEST FEELS FAINT, DIZZY OR UNWELL

1. Stop the session and help the guest out of the device slowly. Do not let them stand quickly.
2. Sit or lie them down. If they feel faint, lie them flat with legs raised.
3. Loosen tight clothing. After heat: move to a cool area, offer water in small sips. After cold: wrap in a warm blanket.
4. Check breathing and responsiveness. Ask about medication, diabetes, last meal.
5. If they do not recover within [5–10] minutes, or lose consciousness, call 998.
6. Do not let them drive until fully recovered. Offer to call someone to collect them.
7. Record on the Incident Report Form.

4.2 COLD INJURY (CRYOTHERAPY OR COLD PLUNGE)

1. Stop the session. Help the guest out of the cryo chamber or plunge at once.
2. Remove any wet or frozen clothing, socks or gloves.
3. For cold burns or frostbite-like skin (white, waxy, numb): warm gently with body-temperature water [37–39 °C] or skin-to-skin. Do not rub. Do not use direct heat.
4. For general chilling or shivering: warm blankets, warm room, warm (not hot) drink.
5. Cover affected skin loosely with a sterile, non-adhesive dressing.
6. Seek medical advice for any blistering or skin that stays discoloured. Call 998 for confusion, severe shivering or loss of consciousness.
7. Report device-related cold injury to Elevé Health; take the device out of use until checked.

4.3 BURN (SAUNA SURFACES, HOT WATER, OR CHEMICAL)

1. Cool the burn under cool running water for 20 minutes. Do not use ice.
2. Remove jewellery or clothing near the burn unless stuck.
3. Cover loosely with cling film or a sterile non-adhesive dressing.
4. Chemical burn: rinse with plenty of water; check the Safety Data Sheet; remove contaminated clothing.
5. Call 998 for large, deep, facial or chemical burns.

4.4 HYPERBARIC EMERGENCY

Only Elevé-trained Hosts who operate the hyperbaric chamber respond at the panel. Hyperbaric is a non-medical wellness session [confirm licensing requirements for hyperbaric with DHA / licensing authority]. Follow the Elevé emergency protocol [Elevé HBOT emergency protocol ref.].

1. If the guest reports pain, panic, breathing difficulty, or any unusual sensation: tell them calmly you are bringing them back to normal pressure.
2. Stop pressurisation and decompress per Elevé protocol. Do not open the chamber before pressure is at ambient unless the Elevé protocol says so for that emergency.
3. Keep talking to the guest through the intercom throughout.
4. Once out, sit the guest up, assess, and give first aid. Call 998 if symptoms continue, especially chest pain, breathing difficulty, seizure, or severe ear pain or bleeding.
5. **Fire or smoke in or near the chamber:** stop oxygen supply as per Elevé protocol, activate the fire alarm, call 997, decompress and evacuate per Elevé protocol. Do not use water on electrical equipment.
6. Take the chamber out of use. Inform Elevé Health and the General Manager immediately.

4.5 SLIP, TRIP OR FALL

1. Do not move the person if they may have a head, neck or back injury. Call 998.
2. If no serious injury, help them up slowly when they are ready; sit them down.
3. Apply first aid: cold pack for bruising; dressing for cuts.
4. Make the area safe: dry the floor, place wet-floor signs, close the area if needed.
5. Photograph the scene (no guest in the frame) and record witnesses.

4.6 FIRE AND EVACUATION

1. **If you discover a fire:** raise the alarm at the nearest call point and shout "Fire".
2. Call 997.
3. Stop all devices safely:
    - Cryo: stop the session; guest out immediately.
    - Hyperbaric: emergency decompression per Elevé protocol; operator stays with the guest until out.
    - Cold plunge: help the guest out, give a robe and slippers.
    - Sauna, salt cabin, red light, dry float, compression: stop and help guest out.
    - Sound Healing and Guided Breathwork: the Healer turns on the lights and leads the group out.
4. Only use a fire extinguisher if trained and the fire is small and your exit is clear.
5. Guide everyone to the nearest exit. Use robes, Aura-branded towels and slippers; do not stop for belongings. Do not use lifts.

6. Fire warden [Name / role] checks every room, including changing rooms, showers, the laundry, the consultation and Sound Healing rooms and the hyperbaric room.
7. Assemble at **[Assembly point]**. The Duty Manager takes a roll call from the day's booking list and staff rota.
8. Report anyone missing to Civil Defence. No one re-enters until Civil Defence gives the all-clear.

Drills: every [6] months, recorded. Fire systems maintained by a Civil Defence approved contractor [Contractor].

4.7 POWER FAILURE DURING A SESSION

Emergency lighting comes on automatically. Stay calm; reassure every guest.

Device	What to do
Cryotherapy chamber	Open the door; help the guest out at once; warm with blankets
Hyperbaric chamber	Follow Elevé power-failure protocol [ref.] for safe decompression; operator stays with the guest and talks them through it
Cold plunge	Help the guest out at once (the water stays cold); warm them
Infrared sauna, salt cabin	Help the guest out; ventilate; offer water
Red-light bed, dry float bed	Open or lift the canopy; help the guest up slowly
Compression boots	Unzip and remove boots manually
Sound Healing / Guided Breathwork	Healer pauses the session, uses a torch and reassures the group

Then: switch devices off at the isolator to avoid a surge when power returns; inform building management and the General Manager; do not restart any Elevé device until checks are done per Elevé guidance.

4.8 LOST CHILD OR VULNERABLE GUEST

1. Get a description: name, age, clothing, where last seen.
2. Duty Manager alerts all staff and checks every room, changing room, shower, device and exit.
3. Staff watch the entrance.
4. If not found within [10] minutes, call 999.
5. When found, keep them with a staff member in a calm area until their parent, guardian or carer arrives.
6. Children are never left unsupervised in the studio. [Minimum age policy].

4.9 AGGRESSIVE OR ABUSIVE GUEST

1. Stay calm. Speak slowly and quietly. Keep a safe distance and an exit behind you.
2. Do not argue or touch the person. Listen and acknowledge.
3. Call the Duty Manager. Never handle it alone.

4. Move other guests away from the area.
5. If there is any threat of violence, or the person will not leave, call 999.
6. Record events and witnesses. The General Manager decides on any future booking restrictions.

4.10 MEDICAL EMERGENCY (CARDIAC ARREST, SEIZURE, SEVERE ALLERGY, STROKE)

1. Call for help. Call 998 at once; put the phone on speaker.
2. Not breathing normally: start CPR; send someone for the AED; follow its instructions.
3. Seizure: protect the head, move objects away, do not restrain, time the seizure; recovery position afterwards.
4. Severe allergy: help the guest use their own auto-injector if they have one; call 998.
5. Suspected stroke (face drooping, arm weakness, speech difficulty): note the time and call 998.
6. Keep going until paramedics take over. One person meets the ambulance.

5. Escalation chain

Level	Who	When
1	Host on duty	Immediate response, first aid, stop the device
2	Duty Manager / Senior Host	Every incident; coordinates response and calls
3	General Manager	Same day for all incidents; immediately for serious incidents, 998 calls, fire, police, device failures
4	[Medical Director named on the licence]	Any health-related incident, for oversight and advice (not on site; 998 is always called first in an emergency)
5	Founder & CEO and Chief Executive Officer ([CEO contact order to be confirmed])	Immediately for serious injury, death, fire, police involvement, data breach, or media interest

The General Manager decides on notification to Dubai Municipality, Civil Defence, DHA, insurers [Insurer and policy no.] and Elevé Health. Only the General Manager, Founder & CEO or CEO speak to the media.

6. After an incident

- Give the guest time and care. Offer water, a quiet space and a follow-up call within [24 hours].
- Do not admit liability or discuss blame; express care and say we will look into it.
- Keep the device out of use if it may be involved. With one unit of each machine, that modality is unavailable; move or offer alternatives for affected bookings.

- Preserve CCTV footage and device logs.
- The General Manager reviews the incident within [7] days and records actions.

7. Incident Report Form

Field	Details
Incident reference no.	_____
Date and time	_____
Location / room	_____
Modality / device (incl. serial no.)	_____
Type	☐ Injury ☐ Illness ☐ Near miss ☐ Device fault ☐ Adverse reaction ☐ Fire ☐ Security ☐ Other
Person affected — name	_____
Guest / staff / visitor	☐ Guest ☐ Staff ☐ Visitor ☐ Contractor
Contact details	_____

WHAT HAPPENED

Question	Details
Describe what happened, in order	_____
Injury or symptoms	_____
First aid or treatment given, and by whom	_____
Emergency services called?	☐ 998 ☐ 999 ☐ 997 ☐ None — time called: _____
Device stopped / taken out of use?	☐ Yes ☐ No
Guest outcome	☐ Continued ☐ Went home ☐ Collected by _____ ☐ Hospital
Witnesses (name and contact)	_____
CCTV / device logs preserved?	☐ Yes ☐ No ☐ N/A

NOTIFICATIONS

Notified	Name	Date / time
Duty Manager	_____	_____
General Manager	_____	_____
[Medical Director named on the licence] (if health-related)	_____	_____
Founder & CEO / CEO	_____	_____
