Infrared Sauna SOP

Document No. AUR-TRT-03 · Version 0.1 (Draft) · Owner: General Manager · Effective: [Date]

> Draft pending Elevé Health operating instructions. Every setting, time limit and cleaning product marked "[per Elevé protocol — pending]" must be completed from the written Elevé protocol before this SOP is used with guests. Where Elevé is stricter, Elevé applies.

1. Purpose

This SOP sets out how a Host delivers an Infrared Sauna session (Heal pillar, 40 min) in the Elevé full-spectrum infrared sauna room. Many first-timers begin here. The aim is a deep, steady sweat in a calm space, with the Host checking in throughout. It is a wellness service, not a medical treatment.

2. Who may deliver

- Only a Host trained and signed off by Elevé Health on the infrared sauna [training pending].
- The guest is in the sauna alone or with [companions per Elevé protocol and booking rules — pending]. The Host checks in at set intervals and stays within call for the whole session.

3. Equipment & settings

Item	Detail
Unit	Elevé full-spectrum infrared sauna room (one unit)
Temperature range	45–60 °C; session setpoint [per Elevé protocol — pending]; first visit at the lower end of the range
Session time	Menu duration 40 min; first-visit and maximum times [per Elevé protocol — pending]
Pre-heat time	[per Elevé protocol — pending]
Host check-in interval	Every [___] min [per Elevé protocol — pending]
Guest kit	Two Aura-branded towels (one for the bench), robe, branded slippers, drinking water
Other	Timer; cool towel; call button [confirm]

4. Contraindications summary

Screen every guest, every visit, using AUR-FRM-03 section 3 and the universal checks.

- **Do not proceed:** pregnancy; unstable cardiovascular disease, recent heart attack or severe aortic stenosis; alcohol in the last 24 hours; fever or acute infection; haemophilia or active bleeding.

- **Written clearance from the guest's own doctor needed:** high or low blood pressure; heart conditions or pacemaker; diabetes, kidney disease, multiple sclerosis or heat sensitivity; metal or silicone implants; recent surgery.

There is no clinician on the floor at launch. If unsure, do not proceed. Escalate to the General Manager, who may refer to the [Medical Director named on the licence].

5. Room & device preparation checklist

☐	Check
☐	Sauna pre-heated [per Elevé protocol — pending]; display shows no fault
☐	Temperature reading within 45–60 °C and matched to the guest's plan
☐	Elevé service date in date
☐	Benches, backrests and floor clean and dry; fresh bench towel laid
☐	Door opens freely from inside; glass clean
☐	Heater panel covers intact; nothing touching or covering them
☐	Drinking water in the cabin; cool towel ready outside
☐	Lighting and music set as the guest prefers

6. Guest preparation

- What to wear: Aura-branded clothing suited to the sauna, swimwear or a branded towel wrap [confirm sauna clothing with Elevé protocol — pending]. Robe and branded slippers to and from the room.
- Remove jewellery, watches and metal accessories; metal can become hot.
- Remove heavy make-up and lotions if possible; they can block sweat.
- Hydration: a full glass of water before entry, and water in the cabin. Avoid a heavy meal just before.
- Complete AUR-FRM-03 section 3, including agreeing the order and rest interval if pairing with Cold Plunge or another modality.
- First visit: the Healer consultation and programme are on file.

7. Step-by-step delivery

1. Greet the guest and begin the breathing ritual.

"Let's land here first. In for four, out for six."

1. Confirm screening and consent (AUR-FRM-04; AUR-FRM-05 where applicable).
2. Show the room, door, controls the guest may use [per Elevé protocol — pending] and how to call you.

"The door is never locked. If anything feels too much, simply step out and I'll come to you."

1. Brief the signs to leave: dizziness, nausea, headache or a racing heart.
2. Confirm the temperature and time. First visit: lower end of range, shorter time [per Elevé protocol — pending].

"We'll start gently today. You can always build next time."

1. Leave while the guest settles. Start the timer once they are in.
2. Check in at every agreed interval with a knock and a few words through the door.

"Just checking in. Sip some water. How are you feeling?"

1. At the end, knock, wait, and invite the guest out slowly. Hand over the cool towel and robe.

"Take your time standing. Let your body adjust."

1. Walk with the guest to the lounge or shower.

8. Monitoring and stop criteria

End the session and help the guest out if:

- the guest asks to stop or does not answer a check-in clearly (enter at once);
- the guest reports dizziness, faintness, nausea, headache, palpitations or chest discomfort;
- the guest looks very flushed, pale, confused or unsteady;
- the guest stops sweating while feeling very hot, or feels chilled;
- the temperature reads above 60 °C or the unit shows a fault.

Never extend beyond the time in the Elevé protocol.

9. Post-session care, refreshments and suggested combinations

- Offer water or chilled infused water and a cool space to rest [menu to confirm]. Encourage slow sips.
- The guest may shower before dressing; fresh branded towels are in the changing room.
- Do not let the guest leave or drive while unsteady.
- Suggested combinations: the classic contrast is Infrared Sauna with Cold Plunge. Compression Recovery and the Red-Light Bed also pair well. Order, intervals and number of rounds [per Elevé protocol — pending]. Always follow the guest's Healer programme.

"If you'd like to try contrast, the cold plunge is ready. We'll take it slowly and I'll be right beside you."

10. Cleaning & reset

Follow AUR-SAF-02 section 6.3, green cloths, wood-safe cleaner [per Elevé protocol — pending].

☐	Between every guest
☐	Used towels removed to laundry
☐	Benches, backrests and door handle wiped
☐	Fresh bench towel laid; drinking water refilled
☐	Floor checked dry; door left open to air if time allows
☐	Room signed off before the next guest

Never spray liquid on heater panels. Daily, weekly and monthly tasks follow AUR-SAF-02 and [per Elevé protocol — pending].

11. If the unit faults

There is only one infrared sauna. If it faults:

1. Bring the guest out and make sure they are cool and comfortable.
2. Do not attempt repairs. Note any error code and switch off [per Elevé protocol — pending].
3. Place an "Out of use" sign and inform the General Manager.
4. Call Elevé Health technical support [Phone]; record in the maintenance log.
5. Offer a suitable alternative (for example, Red-Light Bed or Compression Recovery, after screening) or rebook. Move later sauna bookings that day.
6. Follow AUR-SOP-09 for fault handling and guest service recovery.

12. Emergency actions

Follow AUR-SAF-04:

- Faint, dizzy or overheated: section 4.1. Move to a cool area, lie flat with legs raised if faint, small sips of water.
- Burn from a hot surface: section 4.3. Cool running water for 20 minutes.
- Fire or smoke: section 4.7. Raise the alarm and call 997.
- Call 998 for unresponsiveness, chest pain, breathing difficulty, confusion or seizure. Bring the AED from [AED location].
- Complete the Incident Report Form (AUR-SAF-04 section 7) before the end of the shift.

13. Records

Record	Where kept
Screening checklist (AUR-FRM-03)	Guest file [Booking system — to be chosen]
Consent (AUR-FRM-04 / AUR-FRM-05)	Guest file

Record	Where kept
Session log incl. temperature and duration	Treatment log below
Cleaning sign-off	AUR-SAF-02 section 9.3
Faults and Elevé service visits	Maintenance log
Incidents	AUR-SAF-04 section 7

Guest data is handled under AUR-SAF-03 and the PDPL.
