Combination Sessions & Suggested Sequences — SOP

Document No. AUR-TRT-11 · Version 0.1 (Draft) · Owner: General Manager · Effective: [Date]

> Elevé Health has not yet supplied operating instructions. All rest intervals, number of contrast rounds and maximum combined cold or heat exposure are [per Elevé protocol — pending] and must be confirmed in writing before combinations are sold. Where Elevé guidance or a guest's doctor is stricter, the stricter rule applies.

1. Purpose

Guests often ask, *"What should I do together?"* This SOP sets out how Hosts suggest, book and run combinations safely, using only the services offered at launch. It turns the seven goals in our "Find your reset" picker into simple, repeatable sequences.

Launch services that may be combined: Whole-Body Cryotherapy, Red-Light Bed, Infrared Sauna, Hyperbaric Oxygen, Dry Float Bed, Salt Cabin, Cold Plunge, Compression Recovery, Guided Breathwork and Sound Healing.

Not available and never suggested: IV Nutrient Therapy (a possible future service only) and any wet float tank (there is none). No medical treatments are offered at launch.

2. Who may suggest and run combinations

- **Healers** design each guest's personalised programme at the first-visit consultation [30–45 min proposed]. Combinations follow that programme.
- **Hosts** suggest combinations within the programme and this SOP, and run each step under its own SOP (AUR-TRT-01 to AUR-TRT-10).
- A Host may always shorten, change or stop a combination. A Host never adds a step the Healer programme or screening rules out.
- Questions go to the Senior Host on shift, then the General Manager, who may consult the [Medical Director named on the licence].

3. How Hosts suggest a combination

1. Start from the guest's state, not the menu. Use the breathing ritual: in for four, out for six.
   - *"How are you arriving today? What would you like to leave with?"*
2. Match their answer to one of the seven goals (section 6).
3. Check screening for **every** step in the sequence (AUR-FRM-03), not only the first.

4. Offer one clear suggestion and one gentler option. Never push.
    - *"For sleep, many guests enjoy the red-light bed, then the dry float bed, then a sound session to close. If you'd prefer something shorter, the red light and float alone are lovely."*
5. Confirm time available, the total price AED [___] and how it is paid (membership session, Single Reset with add-on, or package).
6. Record the agreed plan on the Combination Plan (section 9) before the first step starts.

First-timers who choose "Not sure yet — build my reset" receive a 3-step sequence after their Healer consultation. Most first-timers start with the Infrared Sauna or the Red-Light Bed.

4. Ordering and safety rules

No.	Rule
1	No more than three modalities per visit at launch [confirm with Elevé protocol]
2	Heat before cold for contrast: Infrared Sauna → rest → Cold Plunge. Number of rounds [per Elevé protocol — pending]
3	Do not combine Whole-Body Cryotherapy and Cold Plunge in one visit unless Elevé protocol permits
4	No cold or heat pairing with Hyperbaric Oxygen unless Elevé protocol permits (AUR-TRT-04)
5	Breathwork is never done in or near water, and never immediately before the Cold Plunge. After the plunge, only once fully rewarmed, and gentle techniques only
6	End every sequence with a calm, resting step where possible: Dry Float Bed, Guided Breathwork or Sound Healing
7	Rewarm fully after any cold step before the next step. Cool down and rehydrate after any heat step
8	Light sessions (Red-Light Bed, Salt Cabin red light): count total light received in one visit [per Elevé protocol — pending]
9	Maximum combined cold exposure per visit: [per Elevé protocol — pending]
10	Maximum combined heat exposure per visit: [per Elevé protocol — pending]
11	First visits: use the gentler end of every range and shorter durations
12	If a guest feels unwell at any step, the combination ends. Do not "finish the plan"

5. Rest, hydration and transition gaps

Transition	Minimum gap	What happens in the gap
Between any two steps	[___] min	Water or herbal tea; toilet; change of linen; Host check-in
After Infrared Sauna	[per Elevé protocol — pending]	Cool down seated; water; check for dizziness before the next step
After Cold Plunge or Cryotherapy	[per Elevé protocol — pending]	Towel, robe, Aura-branded slippers; rewarm seated; warm tea
After Hyperbaric Oxygen	[per Elevé protocol — pending]	Sit, check ears and comfort; water
Before Guided Breathwork or Sound Healing	[___] min	Settle in the lounge; fresh clothing if needed

Refreshments follow the menu [menu to confirm]. Offer water at every transition, even if the guest declines.

6. The seven goals: suggested launch sequences

Durations are session times only. Add transition gaps from section 5 and Healer guidance. Every price is AED [___] until pricing is confirmed.

Goal	Suggested sequence	Session time	Gentler option	Price
Sleep deeper	Red-Light Bed 20 min → Dry Float Bed 30 min → Sound Healing [___] min	50 min + sound	Red-Light Bed → Dry Float Bed	AED [___]
Calm the stress	Salt Cabin 30 min → Guided Breathwork 45 min → Dry Float Bed 30 min	105 min	Salt Cabin → Guided Breathwork	AED [___]
Recover faster	Infrared Sauna 40 min → rest → Cold Plunge 2–5 min → rewarm → Compression Recovery 30 min	72–75 min	Whole-Body Cryotherapy 3 min → Compression Recovery 30 min	AED [___]
More energy	Whole-Body Cryotherapy 3 min → rewarm → Red-Light Bed 20 min → Compression Recovery 30 min	53 min	Cryotherapy → Red-Light Bed	AED [___]
Skin & glow	Salt Cabin 30 min → Red-Light Bed 20 min	50 min	Red-Light Bed alone	AED [___]
Sharper focus	Guided Breathwork 45 min → Whole-Body Cryotherapy 3 min	48 min	Guided Breathwork → Red-Light Bed 20 min	AED [___]
Beat jet lag	Hyperbaric Oxygen 60 min [confirm licensing requirements for hyperbaric with DHA / licensing authority] → Compression Recovery 30 min → Red-Light Bed 20 min	110 min	Compression Recovery 30 min → Red-Light Bed 20 min → Dry Float Bed 30 min	AED [___]

Notes on the sequences:

- **Sharper focus:** breathwork before cryotherapy uses calm, steady techniques only, with no breath-holds or fast breathing. Allow [___] min of normal breathing before the guest enters the chamber.

- **Recover faster:** the contrast rounds, rest between sauna and plunge, and total cold time are [per Elevé protocol — pending]. Start with one round.
- **Beat jet lag:** Hyperbaric Oxygen goes ahead only if its licensing position and sign-off requirement are met (AUR-TRT-04). If not, use the gentler option.
- Any sequence may close with Sound Healing if time and the room allow.

7. Popular pairings (two steps)

Pairing	Why guests choose it	Key rule
Infrared Sauna → Cold Plunge	Contrast; calm under stress	Heat first; Host at the plunge throughout
Whole-Body Cryotherapy + Compression Recovery	Recovery	Rewarm before boots go on
Infrared Sauna + Compression Recovery	Recovery; muscle tension	Cool down and rehydrate first
Salt Cabin → Guided Breathwork	Calm; easier breathing	Gentle techniques
Salt Cabin → Dry Float Bed	Deep rest	Water between steps
Red-Light Bed → Dry Float Bed	Sleep; rest	Low light in the float room
Any sequence → Sound Healing	A calm close	Sound Healing last

8. Scheduling with one unit of each machine and two Hosts

Every machine is a single unit, and there are two Hosts per shift. Plan the whole sequence before the guest arrives.

1. **Book the whole chain as linked bookings** in [Booking system — to be chosen], including turnaround cleaning time for each unit [___] min. A unit is not released until the Host signs it off (AUR-SAF-02).
2. **Host-present sessions need one Host for the whole session.** These are Cold Plunge, Whole-Body Cryotherapy and Hyperbaric Oxygen. Never schedule two of them to run at the same time.
3. **Hyperbaric Oxygen holds a Host for 60 min.** During that hour, the second Host covers reception, WhatsApp, payments and every other guest. Do not book Cold Plunge or Cryotherapy in that hour. Do not run Hyperbaric Oxygen if only one Host is on the floor.
4. **Group Breathwork and Sound Healing:** if the guide or facilitator is one of the two Hosts, the other Host must be free to respond. Do not book Host-present sessions during a group session unless a Healer or third person is facilitating [confirm].
5. **Stagger starts** by at least [___] min so one Host is never needed in two rooms at once.
6. **Self-running sessions** (Red-Light Bed, Infrared Sauna, Dry Float Bed, Salt Cabin, Compression Recovery) still need a start, scheduled check-ins and an end. Plan these around the Host-present sessions.

7. **Shift handover** [14:30–15:30, confirm]: avoid starting a long sequence in the overlap without telling the incoming Host. Hand over every guest mid-sequence in person.
8. **Last start times:** the final step of a sequence must end, including cleaning, before close at 9:00pm. Last sequence start: [___].
9. If one unit faults mid-sequence, follow AUR-SOP-09 and offer the gentler option from section 6 or a rebooking under AUR-CLI-03.

Example slot plan	Host A	Host B
10:00–10:40	Guest 1 Infrared Sauna (check-ins)	Reception; Guest 2 arrival and ritual
10:40–10:55	Guest 1 rest and water	Guest 2 Red-Light Bed starts
10:55–11:05	Guest 1 Cold Plunge (present throughout)	Reception; Guest 2 check-in
11:05–11:40	Guest 1 rewarm, then Compression Recovery	Guest 2 Dry Float Bed; reset red-light bed

Times in the example are illustrative only. Gaps follow section 5 once Elevé protocols are received.

9. Combination Plan (complete before the first step)

Guest name	Guest ID	Date	Host
_____	_____	____ / ____ / _____	_____

Goal	Healer programme ref.	Screening complete for all steps
_____	_____	☐ Yes

Step	Modality	Planned time	Actual time	Host	Notes
1	_____	_____	_____	_____	_____
Gap	Water ☐ Rewarm ☐ Cool down ☐	_____	_____	_____	_____
2	_____	_____	_____	_____	_____
Gap	Water ☐ Rewarm ☐ Cool down ☐	_____	_____	_____	_____
3	_____	_____	_____	_____	_____

Price	Payment	Outcome
AED [___]	☐ Membership ☐ Single Reset + add-on ☐ Package · ☐ Apple Pay ☐ Card ☐ Cash	☐ Completed ☐ Shortened ☐ Stopped — reason: _____

10. Emergency actions and records

- Each step follows the emergency section of its own SOP and the Emergency & Incident Response Procedure (AUR-SAF-04). If a guest becomes unwell at any step, the combination ends.
- Keep the Combination Plan with the guest's screening checklists (AUR-FRM-03) and session logs in the guest file [Booking system — to be chosen].
- Share outcomes with the guest's Healer to refine the programme, with consent, under the Data Protection & Confidentiality Policy (AUR-SAF-03).
- The General Manager reviews combination records [monthly] and updates this SOP when Elevé protocols are received.
